Indulgence of malicious acts by God

Gruesome murderers

The girl was somewhat adamant
working in a call centre
with male colleagues, one of them
got cozy with her, thick stylish beard
well-built, handsome that was the trap
with which the arrogant foolish girl
got herself tied in a live in relation.

Law now-a-days follows the whims
of socially different individuals
to meet their unwarranted wishes
like infidelity, LGBT, live-in-relations
making justice system a mockery.

When a fruit rots the rotten cells increase
and normal cells become minority
as human society is rotting
normal individuals who once
used to get preferences
are being over looked to accommodate
all types of abnormal humans.

The result is a chain reaction for the worse
the modern freedom of female
does little good but more harm to them.
The girl did not listen to her father
for breaking the relation and come back
to the main stream, instead, she left with the guy
for another location to avoid father.

Soon the guy killed the girl
cut her body into pieces
disposed of them in dark night
in a forest to keep no evidence.
Such stupid girls of one particular faith
are being brutally slain time and again
by another faith gruesome murderers.

Love jihad

Hindu girls are dying
one after the other
in the hands of Muslims boys
I find it quite astonishing
how come these girls opt
time and again for Muslim guys
as their unwed sex partners
knowing from history very well
that they will have to convert or
otherwise also they may be butchered
why they discard their own religion?
Surprisingly Muslim girls do not trap
Hindu boys by Islamic love jihad.

This shows guys are barbaric
whereas gals of Islam are not
or they may not like Hindu guys
as compared to Muslim lads
since most Muslim guys are well built
but their Hindu counter parts are not.
If conversion is the motive, then
why target only girls and not boys
after all Muslim girls are so pretty
why you trap girls of other faith?

Killing girlfriends as well as wives
are known among Hindus
but they never go for Muslim girls
if those girls do not opt for them.

Oh! Hindu girls do not rot your lives
hankering after big for satisfaction.
Why you love to be slaughtered?

A timebomb

A country has all the odds
it got liberation not itself
neighbor fought for it
and handed over
a free country totally free.

Since then, it is fattening
the density of population
skyrocketing making it
the most highly dense
in the whole world.

Who cares!
Each guy has many wives
all of them producing
a long line of offspring
after all their land is fertile.

But how long land will support?
Where is job? They penetrate
in the dark nights
through porous borders
in to the country that got their freedom.

They suck blood of that country
staying there unauthorized
gather all benefits
later join the terror outfits
harm that nation, her people.

The timebomb is ticking
the government is sleeping
extending friendship
when their own religion
is being massacred by the fat nation.

Reclamation

When *Yudhistir* lost to *Sakuni* in dice game in Mahabharata
Pandavas lost their share of kingdom to Kauravas
Duryodhan decided not to give back anything to the Pandavas
and indicated the status after their victory will continue forever
nothing can be reclaimed in future.

Hindus have no other big country except India in the world
the Muslims invaded, looted and converted them in large number
destroyed thousands of temples during their misrules
British were driven out of the country by the freedom struggle
led by the Hindus in the year 1947.

The Muslims who were converted from Hinduism
have become like the Kauravas and do not allow to reclaim
the Hindu temples destroyed by the Muslims rulers
they say what is gone is gone
those cannot be revived.

Kauravas' wicked and adamant attitude caused Kurukshetra war
terminating their rule over India and Yudhistir became the king
why the Indian Muslims do not take a lesson from this fact?
The temples of India are governed by the Gods and Goddesses
it is to see whether They or the Hindus decide the ultimate outcome.

Corona virus

Unseen enemy is on the prowl
it moves faster than wildfire
as human tries to escape
flies from country to country.

This is hungry for human body
rich or poor are all the same
from prime minister's wife
to daily labourer falls victim to it.

A world war has engulfed us
no bullet is fired nor missile
atomic power has failed to it
helpless human is endangered.

Some say it originated from lab
others term it a muted version
but it is so virulent
none dares to face it.

All work is stopped
everybody is banished from
school, college, office,
mall, zoo, sports and what not!

Those who used to fly for nothing
are now performing duties
by video conferencing
saving huge public money.

Terrorists' guns have fallen silent
they are fleeing to saver places
economy is in doldrums
share market is plummeting.

How many will die nobody knows
how long it will persist?
Religious heads know no clue
they are taking shelter to science.

Crime against humanity

Hush! Hush! Dead bodies!
Buses are standing nearby
deep at night, nobody
except PPE ridden persons
are there loading corpse.

They are wild eaters
of snake, dog, cat,
octopus and all dirty meats
raw infecting themselves
with deadly virulent viruses.

Every time a virus kills
humans all over the globe
it is found the origin of it
is the same shameless country
where dirty eaters live.

They are subhuman
somewhat between
animal and human
friend of terrorists,
the human viruses.

These two criminals
have joint venture
one produces viruses
and supplies to the world,
the other terrorists.

Now, we the sane world
must decide whether
it should be allowed to go on
that is out to annihilate us
or we shall make them out of map.

Unprecedented

I have never seen such a thing
no I do not want to see it again
I have been here on this planet
a couple of years short of seven decades now;
this piling of corpse must stop, stop forever.

I know bird flu, man culls chicken
also, swine flu that drives us to cull pigs
it is unprecedented to see a virus culling human
this is, as though, out to take revenge
of all brutalities we thrust upon animals.

The world like a village is in the grip of pandemic
and the countries as if individual households
the most powerful of them America
has become the painful victim of most deaths.
We are proved to be not really that mighty.

We develop one vaccine, another pathogen attacks
us off guard, a grim story of human life.
Who is this enemy that wants us to die?
It is indeed a puzzle why we are reluctant to despise
and fight against that great God, our greatest enemy.

Let us not be puppets

With occupying a body, soul becomes impure;
Self, who is ever free, appears bound.
This is apparent departure from divine existence
as body, senses confuse the individual soul.
In this chaos, man is turned into a mad.
So this world is always full of evils predominantly.
Man is the worst creation in one sense,
because none of other animals are so adulterated
with lowest of low wild nature; so much so that
he is cannibal, eats even snake raw after cutting off its head.
In this utter horrible confusion, man loses track of life.
Here is the role of meditation which helps to focus
instead of one moving around like vagabond.
First learn the purpose of life.
It is definitely not a merry making exercise.
We are slaves under Maya.
This slavery has to be defeated by ousting Maya.
We should have single minded action in this world
and that is 'let us not make fool of ourselves and be puppets'.

Nothing great about It

All epics and novels are depictions of conflicts
which human life encounters day to day.
Ramayana is the story of fight of *Rama* and *Ravana*.
Mahabharata is about war of *Pandavas* and *Kauravas*.
No great literature has been written on peace time.
The same is true for great grand epic
the immortal Supreme power is writing all the time.
The creation is nothing but disturbing the harmony
and making opposite forces to clash with each other.
The calm and quiet Brahma has no story to tell.
It takes the guise of being indifferent,
but confuses everybody with the veil of Maya.
It pretends to be the most ethical authority
without having any fault in It,
when all others grapple in the chaos of creation.
It enjoys own existence in every screech,
the hapless evanescent sentient beings make.
It is totally insulated from the agony of lives
since It is immortal, unlike the victims of Its own play.
So it is foolish to glorify the Creator
praising It as the great savior, the divine Mother,
the merciful Father....
All It does is for own enjoyment
bothering little the pain it may cause to us.
Life is the story of fight against unconquerable brutal Force.

Tacit understanding

Before man, God was unknown.
So It is a discovery of man
primarily to answer questions
which have come to his mind.
The cause of sorrow and its remedy
are the basic questions need to be answered.

Incarnations of God have come to teach
how to go about solving these problems.
Philosophies have been preached and methods
invented to realize God, while living in a body.
Ultimately, all the preachers have emphasized
how serving the poor and weak only God Itself is served.
Many missions or religious organizations have been formed
and millions of devotees have come under them.
Still the vices of this world have run havoc in all era.
Hardly a handful of people have reached the spiritual trance
whereas a huge number of them always lagged behind.

So prophets have not been successful enough
to help mass getting enlightenment even after their best efforts.
If all the people reach the state of spiritual trance
there will be nobody to work, even for producing food for survival.
Here is the clue why spiritual enlightenment has been so difficult.
The purpose is to keep world going with all the vices
so that the humans do not get freedom en-mass.

On the contrary, a very simple method of salvation is extinction
which no prophet has talked about any time.
The tacit understanding has been
to keep the ignorance in people ever brewing
in order to make the ill-fated humankind alive.

No more fooling around

Man is a bound form of the Self.
The bondage is created by the illusion.
As a prince, brought up by an enemy,
is not allowed to know his real identity,
the veil of nature has kept us in dark
so that we do not come to know our divinity
and work for It as slaves.

Man has come to the Earth by evolution
after billions of years of its formation.
Supreme power has given mind and intellect to him
engendering reasoning power
which is not there in insentient beings.
God, a conscious entity, cannot enjoy the inertness and dullness
of materials and animals as much as the intelligence of man.
It enjoys love, joy, sorrow equally and
pains and pleasures of humans do not make much difference to It.
So, cry of man hardly reaches to It, nor his joy.

But the great difficulty of enjoyment of God is
the intelligence imparted in human being.
In the history of mankind, God has come as many incarnations;
but the miseries of man have remained the same all the time.
The only thing, which has got fillip, is Its enjoyment
and that is what is the only purpose of Its whole creation.

But no more fooling around will be endured.
Man has come to know the trick.
Seeing himself a puppet in the hand of God,
man has decided to enjoy himself and perish.
There will be no humans in the long run,
nor the God will get Its playmates in them.

Expose the evil God

I find man as a fool and self-defeating creature
when all religions profusely praise the Creator.
God is pure since It was never made.
Anything created has to be with flaws
since its existence has boundary conditions.
God even comes under this law
since everything It creates has defect.
Man, the highest creation of God, is the ugliest
since he misuses the mother earth the most.
All religions are creation of man,
but spirituality is not
as it is never created.
Spirituality is not flawed, religion is.

Whatever exists good or evil
is created out of God Itself
since It is the genesis of all.
So it is surprising that man
who boasts for his ability
becomes so timid in front of God
praise It to get favors.
This is the origin of corruption
as all culprits take refuse to God
after doing heinous acts.
God being also the devil obliges them
leaving all others in the lurch.

So I vehemently appeal to brave hearts -
no more appeasement of God
fight against Its all misdeeds
what Maya, Its escape goat,
hurls upon us in the name of Lila.

Awake your own Self

Buddha, the great enlightened soul from India
kindled so many hearts all over the world,
waves of Buddhism reached shores abroad;
but India did not embrace it.
Today India has very few followers of him,
that too mostly lower castes.

Terrors which bring down world trade center,
attack parliament to uproot democracy....
hardly respond to heart.
Kashmir is still a terror target after decades
no peace effort is successful there.
A prime minister goes for peace talk
and is appalled by attack at Kargil.

God incarnations brought limited success.
We need not follow their foot prints blindly.
We must keep our Self awake all the time
and It will show us right path,
not outside teachers, who are merely
seers of self-interest, not the Self.

Devious

Long ago when you were alone
even time was not with you
I came forward to give you solace
broke your monotony from which
you wanted to flee forever,
suddenly you erupted so violently
that it has produced today's peril
sufferings of all relentless unavoidable
yes, it was I who gave you company
have you forgotten all that you owe to me?

On the contrary, you make tall claims
you think yourself all in all
fear is not there in your vocabulary
you can do whatever you want
you actually are doing all nonsense
deviously riding a mad horse
to unknown destination
you may not be able to choose
still, I am with you to help
but you are so adamant!

You are unbeatable
as you have all weapons
to make others' life hell
but now I have decided
I shall no more be with you
what can you do to me?
Your evil power can only kill me
as a drop of water evaporates from sea
becomes clouds and floats to go far away
I also will vanish but fall as rain drops again.

Hypocrisy guides creation

In my whole life, I am yet to see a moment
which is completely devoid of any fear or anxiety.
When I imagine my fantasy of creation
it appears different from what we have got.
There, I find an ocean of consciousness
from where creation takes shape
and objects created are always aware
of the fact that they are on a voyage, for a change.
Why introduce ignorance when life is formed?
After all, the incarnations of God live in this world
fully knowing who they are and why they have come.
Imposing good and evil in life with latter's predominance

the creator has made us suffer endlessly.
All sorrows and agonies of humanity or other lives
are due to the willful arrogance of the creator.
If the creator is all powerful
It should make every individual soul
free of any suffering, as It itself is.
It is hypocritical to play with others' miseries
for the sake of Its own enjoyment.

Cruel Creator

The whole existence is a unit
nothing can be outside it.
One atom has equal numbers
of electrons and protons
making it electrically neutral.
Neutral object cannot harm
anybody by electrocuting,
but once electron goes out
of an atom it becomes charged,
as also if electron is added
to an atom then also it gets charged.

Good and evil are equal in existence
as also joy and grief, light and darkness.

As per Hindu mythology, the gods in heaven
cheated the *asuras* by stealing nectar
for themselves to consume it
that made them immortal.
The *asuras* remained mortal

as they did not get share of nectar.
Gods and *asuras* are thus ever enemies
while Gods represent the Almighty
rest of all mortals are *asuras*.

This story has a great significance
as it is true in every facet of life.
The concept of heaven is that
there is all good no evil.
It is charged by good at the expense
of mortals on earth that is charged by evil.
So we humans, animals and other living beings
suffer so much here and the Creator enjoys.

Beloved who expired

There were two bodies
lying in the morgue
last night one died
still fresh enough
face on the floor
another decomposed
seeing all disappeared
to search men of mortuary,
his dear one died
went alone to lift body
no relatives came forward
with the help of one person
took the body to stretcher
then to a cot on a truck,
everybody was fleeing
to catch a car from there
surprised, he called one
to sit in the lorry
beside the driver
since he was the son-in-law
of the expired person
he himself was touching
the body all the while
on the vehicle since
at this time, it is said
something wrong can happen
to the departed soul.
Greif and heartlessness
pounded him simultaneously.

Jaws of death

Life, oh glittering lamp! you
attract humans as moths
only to be perished in your fire.
Many, like intoxicated fools sing
your glories and beauty
soon terrifying vortex sucks them
into mysterious black hole
leaving skeletons lie apart unsung.

Peril of death

Titanic sails in north Atlantic
hit iceberg on its way
it sinks driving everybody to doom
only some survive.
Nine-eleven air attack in New York
causes death of thousands.
Earth quake followed by tsunami
sweeps away innumerable people in Japan
millions of men, women and children
are perished in terrorists' violence
all around the world lasting many decades.

'Cause and effect' cannot explain these catastrophes
simply because it is hard to reconcile the argument
that all bad people only are assembled together in every occasion.
Who controls the accounts of so many people so precisely?
Ramakrishna, the incarnation of God in India, dies of cancer
what is the cause of this awful incident to such a pious soul?

It is all arrogance of nature which imposes everything on us
being powered by the Almighty, the Omnipotent.
'Cause and effect' is effective in only paltry matters
like bad food will lead to disease and so on.
At the most, ill-treatment of a perpetrator will come back
and punish him in the long run.

The creation itself is said to be only manifestation,
it has no cause, even though it brings the peril of death.

Dance of death in *Kedarnath*

The brutal inflexible nature
indulgent in fruitless activities
makes people full of perversion
kills innocents by
tsunami, earth quake, super-cyclone....
This unchecked cruel madness
does not show any virtue.
How nature is still a part of merciful God
while behaving like Satan
without compromising its steadfast attitude?

Oh humans, pure Creator becomes impure
when It annihilates Its own creation.
God and Satan are not different
just as the sweet water
which quenches our thirst
drowns thousands in Himalayan tsunami.
Hindu devotees, out for holy pilgrimage to
Kedarnath dham
the abode of Lord Shiva in Himalaya,
are washed away to death.

Dubious game

In the chaos of creation,
mounds of matter take shape,
life comes by evolution
forming man at the end.

The Almighty is in the dubious game
lifting one and drowning other;
what is the ultimate outcome
is a matter to ponder.

Our real nature is divine,
which is unchangeable;
when mind dances in Maya's tune,
we become her victim, irresistible.

Brutal God

I am against the personal God
renounced also my human guru
I believe in only my own Self
and achieved many successes.
This has angered the God
since then, it has made me fade up.

We went to Australia tour
it brought to me unbelievable sour
as I started planning for it
I became seriously sick
dyspepsia and dysentery
attacked me severely.

Taking all possible medicines
we started the travelling
our flight to Singapore was late
we ran for the connecting flight;
as we landed in Melbourne
I got a bout of diarrhoea at night.

I took medicine for that
vomiting weakened me a lot
somehow, I was continuing the tour
my chest became tightly congested
coughing became unbearable
losing consciousness was inevitable.

One day when I was wave checking in
I coughed and fainted for a while
my wife became very anxious
still my sufferings did not stop
my both eyes became red
I could not see curser to fill up forms.

I never sought help from the brutal God
I do not know why it is after my blood!

Oh God of death

You came dancing down
your fangs wide open
spewing venom

I just reached home
exhausted, ill
journey of peril

torn me in to pieces
as crocs eat flesh
caught unaware

you were an invader
my lungs were full
I searched tool

for easing my breath
to get rid of filth
as I scheduled

to go to a foreign land
you attacked me
I lost all glee

as typhoid made me down
you were so mean
tried to kill

proved yourself so cruel
oh God of death
I lost all faith.

The Wrath of God

Dark room
a man is sleeping alone

deep at night
suddenly he finds

everything
is rotating not stable

his eyes are closed
cannot open as he feels

he will fall
even though lying on the bed

not able to get up
a whirlpool sensation

in his brain
blurred vision difficult dialing

only able to see
the mobile photo in contact

somehow dials wife
repeatedly without any answer

a medicine
only a few feet away

not able to reach
feels will fall down

from the cot
almost faces the death

the wife
is sleeping in another room

unknowingly
keeps her cell phone silent

the man
is down almost out due to typhoid

when God is angry
all doors close preventing escape.

I met God

Meeting God is a wonderful experience
for which many devotees hanker after
considering it the highest goal of life.

God has been met by different people
in many different means and ways
most of them by bhakti yoga.

They want to meet It as the beloved
the endless ocean of love
in which they like to dissolve themselves.

Some get It as the divine mother
or the father who is the savior
Yashoda got It as son and so on.

Experiencing the immense power of God
is also meeting It, not as the lovable
but as the most unconquerable entity.

I went against the God vehemently
for many unfortunate ills It causes to us
abused It left and right spurring venom.

I was about to leave for Japan with my wife
paid huge amount of money to the tour operator
but two days before the journey I got typhoid.

It attacked me with Its deadly weapons
typhoid was accompanied by
asthma cough, severe dysentery, arthritis.

Over and above that my brain was invades by gas
I could not lift my head lost control on myself
soiled my bed passing stool and vomiting.

It was so severe that I felt I may die
it was deep at night, my wife was also helpless
that day I bowed to It seeing Its supreme power.

To Punish God

Grief! Grief! Grief!

Wherever I look it is
grief, grief, grief
I am floating on it
it is so captivating
so mercilessly sad
melancholy engulfing
I do not want to come out
because I tried repeatedly
but failed every time
now I feel it is impossible.

The nectar of life is drunk
by the con-Almighty
it is inebriated
does all nonsense
that should not be done
in absence of any juice
we live high and dry
grief, grief, grief
there is no escape
then why should we be here?

Yes, that is the only way
to defeat the unscrupulous
ever oppressive cunning God
destroy whatever it makes
do not preserve animals in parks
can you allow virus to grow
why then preserve tiger, lion
it is self-contradictory
one woman one child
no bloodshed, go for extinction.

Mystery of life and death

I went to the kingdom of fundamental particles
my body being so coarse I sent my mind in
I found they have rhythm of life.
They move in orderly fashion
change their positions under specific conditions
even take birth and die when situation arrives
during nuclear fission and fusion reactions.

In such a gigantic universe what is happening
how it is happening, why it is happening
are matters beyond the reach of tiny human
whatever we invent is through our lens
it is a relative conception we arrive at
no absolute knowledge is attainable
because our mind is too small to hold it.

Innumerous galaxies, stars, planets
are forming and disappearing
it is their birth and death like ours
by birth they take a form
by death they get dissolved in the universe
get salvation to end the cycle
human too can get salvation by extinction.

Salvation within life

My mind flies through the whole universe
looks for God to get salvation
all it finds there are planets, moons, suns and stars...
not sure some of them hold in them life or not
as we are in earth - moving, laughing, crying...
We are tired of living alone among insentient matters
none of them can reciprocate to the pain and pleasure
what we get every day in our lives.

I grasp for a reprieve
perhaps that, in other words, is called salvation.
All souls of living beings are connected to each other,
one getting relief, leaving others in dismay
does not mean salvation.
Then what is it?
Leaving the body by dying is no solution
since my soul will cry in others' bodies as well.

We always aspire only for joy
which makes us so vulnerable to sorrow.
Our miseries will disappear
if we can forgo this aspiration forever.
Oh! my soul, that is the great truth
let me learn to overcome the desire completely
and my salvation will be right here
even when I am in my body.

Real salvation

Searching the meaning of salvation
I penetrated through the history of life,
came to know the earth on that day
when she gave birth the first sentient being.
Before that there was no personal soul
since no life existed earlier.
Gradually bushes, plants, micro-organisms, insects,
animals came and lastly man.
Personal souls went on increasing and I wonder
how their numbers thrive even now from one supreme Soul!
The more there are personal souls the more is wait for salvation.
This wait is never ending if souls go on increasing.
Salvation of a man means nothing
since many others like him are waiting
and in all of them his soul is also linked,
as no soul is a separate entity from other souls.
If salvation has anything to do
it has to be for all sentient beings together.
Inanimate objects are not having personal souls,
presence of them cannot hamper our salvation.
But real salvation of even one of us will be possible
when none of us will exist to struggle in this world.

The best solution

Where do I stand?
My answer is ‘nowhere’.
Since by ‘I’, people usually mean
their bodies, minds, intellects.
All this has only evanescent existence
like an ocean wave:
so long as the water rises
it appears to exist
but when it subsides nothing is there.
Yes, life may be only transitory existence;
yet still I exist in my sorrow, in my happiness …
I find it quite punishing!
Life is a blunder of creation
which the Almighty could easily avoid.
The pity is that It wants to enjoy
Itself at the expense of our awful sufferings.
Nobody can question It
since It is the most powerful Force
and beyond cause and effect
Only two options are open to me.
Either I should follow a religious path
and get salvation or the whole of life should perish
never to return again.
Extinction of humanity or even life as a whole is ideal
since my salvation alone is of no use,
as I am linked to every individual soul.
Peaceful extinction, gradually
tapering out birth, for our own sake, is the best solution.

Discovery of Truth

I sat in meditation
closed my eyes
controlled my breath
still I could see
through my mind
as stray thoughts
were passing through
gradually they subsided
restless mind became calm
like a lake or an earthen lamp
in absence of any breeze.

In that lake truths started reflecting
I found my body as if a solid mass
my true Self came out of it
and got mixed up with eternal existence
homogeneous monolithic oneness
where my body appeared like a dry leaf
floating like a bubble in water
disappearing in the black hole of time.

I firmly believe now that
it is futile to run for anything
however attractive and precious
it may be like gold to human
I do not need them
as all of them has life span like the bubble
that ruptures in no time and gets lost forever.

I am essence of all

The moment I close my eyes
I go to that world
where thoughts only move around
no figures and forms dwell.
Eyes or sense organs
these are only instruments
which give us relative pictures
that we perceive to be real.
What a blunder!
I cannot see myself
since I do not have parameter
nobody can touch me
since I am not matter.
I am infinite, present everywhere.
Do not call me by name
since that binds me to a limit
I am the truth of all phenomena
effulgent light and vivid knowledge.
Tear off the futile boundaries
since I do not like to be funny body
nor mind, not even intellect.
Let me be always awake
as essence of all whatever exists.

I believe in my own Self

It is after me all the while,
a monster that loves to see
me suffering, crying; asks
me to surrender to Its infinite
power making me Its slave.

I do not bow my head, I
cannot obey a tormentor.
It wants unconditional love
from all. Others worship It
in fear of harm and pain It
inflicts to everyone who rebels.

I believe in only my own Self
who is nearest to me; without
it I cannot see, hear, feel, taste
or smell nor I can understand
anything of this creation.
I love that Self as it is my only
strength to overcome all enemies.

I need no institution, religion
or person to show me path
since I have not found anybody
so far who can help me selflessly.
They give lip service, take advantage
of my precarious situation and jump
on me to take my flesh out in the
name of ‘service to a good cause’ while
inherently it serves their interest only.

Refuse to exist

Vast blue sky around us
stretches mind to infinite
with endless desire we live
but one day it perishes
leaving behind scars of pain.

What for we are born
why we have to die
how we can remain pawns
in the hands of unseen devil
bowing down to it crying?

Close down all temples
there is no need of church
mosque is meaningless
why you worship, whom?
No religion can deny death.

Women fight for freedom
from the tyranny of men
coming out of home
they face abuse globally
instead of merely inside the family.

Oh! girl you look so pretty
why lost way to knit a family
you have been drowned
in glamour of outside gimmick
replacing love by pervert lust.

Oh! human do not chant
'Life is so beautiful'
being immersed in filth
making fool of yourself;
refuse with all might to exist at all.

I am alone

A deserted place
divided by a fence
nobody is around
only a meadow
is present there
no other life.
It is a barren land.
Question arises and
I look into myself.
It is as if my life
a photo copy created.
I am standing in a
landscape, a symbol of my life.
Nobody really bothers for me
whether I remain or not.
It is true for all.
Every inch of my life
I alone have to live.
Others will come and go.
They will live their lives like me.
When I was born
I came alone,
when I am fighting
to live my life
I am alone,
when I shall leave
I alone have to go,
nobody will accompany me.

Extinction is ideal

In harsh winter
lake has frozen,
mountain monk
meditates in cave
submerged in snow.

In plain, monks
live in ashrams,
work is worship
for them, serve
poor people.

Scientists send
rockets to space
to discover the
mystery the moon,
planets bear.

The common feature
in all of them is
everybody hankers after
pleasure, happiness,
joy or bliss as they can.

All these four faculties
are same in nature
vary only in degree.
Monks arrest sexual
pleasure for divine bliss.

To get a relief from painful
cycle of life we can
utilize all of them but
bliss is not for all
to get salvation, extinction is.

Nirvana

Thoughts of a man shape his future.
A person becomes a thief
as he thinks of stealing.
If I am a good guy
it is because I have thought in that way.
I am fed up with this world
because of its evanescent nature
where joy is always followed by sorrow.
I never feel safe here myself
since one trouble or the other
is following me all the time;
may be with some glimpse of hope
as a silver lining in some occasions.
But none here can claim absolutely free of worries.

Constantly fighting with the darkness
I do feel to get rid of this bondage
by renouncing the deceptive world
someone whispers, 'do not get carried away
the glories of life are shallow, without substance'.
I see the light of Nirvana from the horizon.

Mass salvation

In the life of great uncertainty, oh human being
what cheer are you looking for?
Don't you find behind every joy
there is a long queue of misery?
Some call the life very beautiful
I really grapple to fathom,
do they find even a day whatsoever
which is completely free of anxiety?
To take a pure breath when we are not sure
what this world can give us I fail to imagine.

In nature, most of the occurring thrived after arrival
corona virus or HIV or even human population
there are a number of examples.
But look at the universe,
there is only one planet so far
containing human and other sentient beings.
This implies only one thing
that the universe does not like
the kind of experimentation in earth.
The troubles we face are so huge
God does not seem to be confident
to make more planets like ours.

To get rid of these troubles
many prophets have come.
They had their gospels.
But salvation of one or a few
does not make any difference
a way is needed to be formulated
for our mass escape.

There are many species
which were earlier present on this earth
dinosaurs is one of them
that have disappeared for good.
Man also should work out
a comprehensive road map
which will enable us to make
a peaceful means to end the life.
Population control must be taken up
as the highest priority,
by reducing the number of people
we can decrease the plight of hapless souls.

(Without stanza break)
Monks take vow not to marry and
many couples, now-a-days remain together
but do not have offspring.
The same can be further extended in large number
so that malnourished, ill-equipped persons will vanish.
Humanity can then decide the course of their final push
so that they will come out of the cycle of life and death forever.

The new religion

The Universe is infinite.
Humanity is finite.
Man thinks of God only to explain
the unexplained natural phenomena.
The God Himself
is hardly worried about the tiny mankind.
Needless to say that
there is no necessity of God
unless man wants to sustain himself.
The idea of God came with man
and it will disappear when man vanishes.

The question is
who needs this mankind?
Answer must be - the Creator.
Human is a compound
made out of the only element, known as God.
It is the interest of the God
to make sure existence of life.
All lives tell, invariably, their painful stories
in this horrible world.
With the hope of happiness
poor people suffer all their lives.
To make life go on and on, for Its own pleasure
the Divine Power takes the help of Its illusion.
Man, like fools, grapples.

So, it is prudent for all lives
to refuse to exist in this hell of a world.
Oh my fellow human, listen with great care-
allow all of them who are on the verge of extinction
to disappear peacefully to get rid of these sufferings.
You also look for your turn and work hard
so that it comes quickly enough.

Oh God incarnations leave us alone

At the culmination of spiritual enlightenment
sages attain trance and get long cherished bliss.
But what is the use of it I do not understand
you get bliss alright but it is not everlasting
in the miseries of worldly life, you deep in it
and avoid all the agonies of human life
but to live you can't do anything what so ever
somebody needs to assist you all the time
to keep you alive financially, physically.

Jesus Christ attained this kind of trance
but see His fate, was killed brutally crucified.
Ramakrishna who used to get trance frequently
died in cancer after long ailment and pains.
Both of them were unable to prevent it
what a tragedy! They are said to be God incarnations
how can they die so miserably totally helpless?
People say they came for the rescue of humankind
what rescue You have done, nothing.
Bloodshed is still there as well as cancer.

Bliss for some time has no value when You suffer
so horrible punishment even after enjoying that.
Some say they get salvation after death of them.
This is again a big fallacy. If you get salvation
then how you come to this world at different times
in the names of Rama, Buddha, Christ or Muhammad?

I rather will be pleased if none of you come and preach
to start different religions making us fight all the time.
Let all religions vanish from this earth, let nobody
is born as God incarnation or prophet, You tried and failed
leave us on our fate we shall get our salvation by extinction.

Corrupt creator

Humans are fond of power
most of them want to conquer.
In the process they even smash
whoever comes in their way.

Power blended with selfishness
is a deadly combination
the more it becomes strong
the greater is the damage and harm.

The God is the most powerful
none can stop It from anything
the tsunami washes away, cyclone crashes
earthquake destroys, who can help?

The life is a tale of sorrow and distress
man seeks solace there in vain
for the enjoyment of the Almighty
he lives his life as slave.

The Creator is all powerful
who can stop It from creating life?
But man can certainly stop breeding
To teach the tormentor a lesson in its own coin.

Doomsday

In my dream I found
a huge star exploded
bigger than the Sun
pieces from it thrown
around the universe
radiation scattered
some arrived in the Earth
scientists examined
one planet like part
is destined to hit us
about after four centuries
no escape from collision
we shall be annihilated.
What to do, we have time
world leaders gather
after series of deliberations
with scientists they decide
we must not die so horribly
rather let us get extinct
before the doomsday comes.
How to do, reduce population
every generation by half
not by killing but allowing
one woman to bear one child
whoever will be left there
will go to the Moon or Mars
science will do needful.

Most people are immersed in filth

Everything is gloomy nothing to cheer about
I have done many good things for others
but the moment I do a mistake inadvertently
all of my sacrifices are forgotten by all
even I cannot extract satisfaction from my past deeds
melancholy is every day's companion to me which
appears to be impossible to demolish and turn around.

Those, who say they are happy, are cheating themselves
pleasure from money, sex is all momentary and soon
its' effects fade away and people indulge in activities
like drug addiction failing to find a meaning of life.
But they are so tightly bound by Maya that they do not
try to come out of this vicious cycle of pain and gain.
I told the world to go for self-imposed extinction
by way of producing only one child per woman
wrote poems after poems, published book
but where is the taker? They suffer from inertia
and remain immersed in filth of awful life.

Earlier I used to help people by money or other kinds
surprisingly those very guys and gals reciprocated with
jealousy or even tried to harm me subtly
defame me in public with malicious intents.

This has disgusted me and I fear and hate to help anymore.

Ignorance

Ignorance is the mother al all sorrow
Spiritual meaning of it is difficult to follow.
Whatever appears to exist before us apparently
is false since it does not remain permanently.

Man sees a baby grows to become youth and old
once a person dies, grief becomes many folds.
The Self remains in every stage, even after death
But ignorance deprives us to grasp this truth.

For common man, I like to offer a simpler meaning
which will bring to them an easy understanding.
Ever increasing population is at the root of every problem
one does not need to be brilliant to fathom.

Humans can come out of the vicious cycle of misery
once all of them adopt ‘one child per woman’ theory.
This will bring down not only population, but also conflict;
even they can get salvation by extinction obeying this fact.

Ignorance is artificially preserved
we only need to make up our mind.
The day we shall follow the theory
we shall surely escape nature’s fury.

Choose freedom

Hallucination has gripped the whole creation.
Like a fool, humans believe in a super natural Saviour.
Who saves whom?
It is only the Almighty that is responsible for
the creation and annihilation of all forms at Its will.
Rather, let us choose gradual extinction of all.
The more we diverge, the more is anxiety
the more we converge, the less is pain.
Manipulated extinction of humans
will bring a great advantage.
God will not be able to hold sword on our heads
and direct us to dance in Its tune.
We shall be able to do whatever we like
so long our fellow beings are not annoyed with us.
Very little rules or ethics will bind us
rendering much more freedom.

On the contrary, if we abide by the godly people
they will hardly ask to reduce the population
lest they will have nothing to do
for want of followers.
They behave like agents of God
and create camouflaged chaos in this world
so that they can preach harmony.
Monks opine that householders are inferior to them
but can they themselves be born without parents?
This is the hypocrisy and contradictions prevail everywhere
which we foolishly preserve calling it, the wonderful world!

Spiritual salvation versus self-imposed extinction

Whatever created is going to be annihilated.
From insentient matter to human,
nobody is exempted from this inevitable.
To overcome this, human seeks salvation.
Spiritual enlightenment is well known;
but self-imposed extinction is my discovery.
This has given me the crest moment of my life.

Religions have engendered enlightened saints;
but their number is ridiculously small
as compared to the vast population.
These could never drive away evil altogether
or establish good forever.
Prophets preach only to docile people to become divine,
but they could never slay devils permanently.
Science is progressing, religions are preaching,
but rape, murder, oppression, deprivation ….
are going on unabated.
They have no answers to the endless brutal atrocities of nature.
Tsunami, earth quake, super cyclone, epidemics...,
there are innumerable ways the nature has
to kill innocent living beings;
pitifully though, they are not born by their own insistence.
Sentient beings are always kept on toes to abide by
what is imposed upon them by the Supreme Power.

Self-imposed extinction of mankind is a well thought out plan.
Humans can decide themselves how long to live and enjoy
by restricting the birth of offspring;
having only one child per woman.
The less is the number of heads in the earth
the lower will be the miseries,
as there will be plenty of resources.
Maintaining a population
which the mother earth can hold easily,
humans can avoid fight outright among themselves.
When humanity feels sick of the world,
it can further reduce birth rate
to enforce its own extinction
without shedding even, a drop of blood;
unlike in the above case
when only handful of privileged sages
will attain spiritual trance
and enjoy super-consciousness
when rest of all will die

(Without stanza break)
in natural mass destruction resulting to extinction.
Here, no austerity, dos or don'ts is to be followed
as prescribed in religions,
other than following the simple principle of live and let live.

Establish the new priority of life

Our all activities are centered to avoid death
we go to school, college, university
to get educated so that we get job
and learn to fight all adversaries
we earn money to eat food
so that we can survive
defeating hunger
can consult doctor when ill
take medicines to conquer diseases.

Religions and their prophets and leaders
make our life complex by dos and don'ts
they brain wash us for a better life
with full of luxuries and enjoyments
even they lure us to reach heaven
where everything is good
unhindered sex with beautiful girls
no grief only pleasure,
if one fights for own religion and kills others.

Here also we need to fight against death
there are habitual perpetrators of violence
their job is to do harms to people
belonged to opponent peace loving religions
they burn national and other people's properties
kill innocent people by terrorism and hooliganism
declare themselves brave and other cowards
they do not have positive thinking to build nation
only grabbing others' wealth by hook or crook.

Time is rife to change our central thought
it is wrong to live only to avoid death
we are here as humans not by our will
it has been imposed upon us by the Supreme Power
our living in this horrible world of sufferings
gives the Creator pleasure at the cost of our pain
we will have to rise against it
our life should center now around the thought that
we must go for the extinction at the earliest.

Ultimate desire of terrorists

My mind went to a dream land
where ghosts of terrorists lived
each of them killed many humans,
who were mostly from Hindus,
by killing they dreamed to enjoy
a similar place like this one
where so many beautiful girls
met their carnal appetite
no restriction was there
they had sex
with as many girls they wanted

these were all mental game
since after death none had body

enjoyment went on and on
a time came when they lost
all the attraction towards girls
they started homo-sexual acts
that too became distasteful
they tried all permutation
none remained forever
that time they felt
they should vanish
lock stock and barrel
for extinction.

Family is becoming extinct

Family? Oh no, where is family now?
I mean pure family that has an ethic.
Head of the family has girl friends
his wife has several boy friends
they all have sex and produce children
these children are half-sister or half-brother
purity has vanished from the society.

Now so-called family members are not
having any heart and have mostly a rotten head.
To meet sex, even women now kill husbands,
murdering wives of course are very common.
Every other day newspapers report that for property
a man kills his brother or even entire family,
one woman kills all family members to have
unhindered sex with her paramour.

In some other cases parents go for work
children are dumped in baby-sitters or high and dry
at home where they gradually start doing nonsense
calling friend inside their house and have free sex.

In some countries some family value is still left
children take care of their old parents.
But due to the modern life of extreme competition
many leave their parents and go abroad.

From joint family earlier we got nuclear family
now human society is drifting towards no family.

Humbug humans

In Australia I happened to visit a park
no, it was not of human but of animals
those who were extinct
the replica of them with artificial howls
took me to millions of years back
they used to live on this same earth
now they are no more
they will never be here ever
a nostalgia gripped me
I thought how fortunate
these animals were
why I could not be any of them?

I repent thinking that I am a human
erroneously or perhaps deliberately
we boast about our own species
demeaning all animal inferior to us
but it is only some animals
that have got salvation by extinction
what we could not till today
living in this world
is synonymous to intense sufferings
those animals got rid of all these pains
they are much superior to humbug humans.

Salvation by extinction

Clouds of uncertainty loom large,
unmarried girls and boys
are increasing day by day,
unemployment is creating monsters
who become terrorists, drug addicts,
murderers besides inflicting depression.

Even after suffering from all the agonies
humans remain as oblivion as ever,
a kind of inertness and stupidity
have engulfed them as though
they have no head to think-
what is good for them!

God, religions, science are manmade
if human is not there, none of these is there
the earth still exists with animals, plants.
Human is the culprit for the imbalance
jeopardizing the safety of the earth today,
then why not human gets extinct?

You fight each other for religion
using weapons developed by science.
Climate change is largely caused by you
endangering other lives on earth as well.
You better go for one child per woman
that will fetch you salvation by extinction.

Philosophy of peaceful life

Any life or matter is evanescent.
Humans mostly do not live
abiding by this principle;
as we are most addicted to our body.

No law on earth is absolute;
every one of it is made
to run the show of creation.
Sin is not a sin in all circumstances.

By creating, the pure Almighty
becomes impure since in every existence
there is good as well as evil.
Supreme power is both God and Satan.

Population growth is the mother of all problems.
Humans are selfish and do not accept this.
The humanity cannot live together as a monolithic entity
without fighting each other for immediate gain.

No religion is absolutely essential for human existence.
In prehistoric era there was no religion,
but spirituality is eternal irrespective of we follow it or not.
So, fight for superiority about one religion over the other is ridiculous.

Cure of sufferings of human lies on its reduction of population.
One child per woman should be the principle of all.
This will reduce mouths to eat and hands to fight.
Also, we can choose our salvation by extinction whenever we like.

Unique empowerment

No gain, material or fame, in this world is empowering
since effect of such accomplishments is transitory.
Life belongs to negativity, as it ends to death
but death is positive, as it can end to life only.
We are dancing with joy like stupid
when Maya, the active form of God, is fooling us
giving all sorts of glittering baits of life.
This is the greatest tragedy.
We should be appalled getting a life
and in case we are compelled to have one
we must refuse to abide by simply by adopting own extinction.
Nirvana, preached by prophets, emancipates a few sages only
whereas extinction, controlled by human
can lead to mass salvation.
I am so empowered now by discovering this unique truth
when humans no longer need to beg for mercy of God.
Merely enjoy life without numerous religious restrictions
just like a film show and forget it
they go back to eternal formless state by extinction.

Peaceful decisive evolution

Humanity is the greatest creation,
but it suffers from hallucination.
To live at any cost is its goal
knowing well it has a big hole.
The sure death is that cavity
which is man's ultimate anxiety.
Religions come into picture
to make man's life better.
They give paths to follow
many persons find it hollow.
Some even go transcendental
and enjoy bliss, supernatural.
Still mankind remains the same
with glory and also shame.
Even seers say evil and good will remain
in all ages of creation and every domain.

Then what is the great thing we achieve
except being pawns in games from God's archive?
Time has come now to become prudent,
we must evolve not being complacent.
Love to live must be dispensed with,
because it makes us suffer in filth.
This is the most harmful addiction
with which God shows us affection.
Let us not live like fool
and find out our own tool.
We must decide ourselves whether to live
or find out the mechanism to leave.
When the earth will appear nothing but hell
we shall prepare ourselves for a great fall.
Peaceful gradual extinction is the best
by controlling our own birth rate.
When there will be no humanity
man will escape game of Almighty.

All will fall in line

I am the protagonist for the
campaign of ‘salvation by extinction’,
published many poems on this subject
in several journals in different countries,
a number of years have passed
since I visualized this truth myself first time
though editors of those journals
that accepted my poems on this topic
understood what I was saying
general attitude that I encountered
from my family friends and public
was defying my discovery terming it ‘not possible’.

But fact is that all ensuing events in the world
is going to the same direction as I have been asking
the whole world to adopt for peaceful life.
The demographic data of many countries indicate
that number of children born by one woman
is decreasing constantly even reducing to less than two.
Other women who still give birth more than that
their rate is also reducing gradually.

Economic pressure, competition in every step of life,
climate change causing natural disasters and so on
are the reasons for this demographic change.
Recent development is that many in younger generation
do not want child even after marriage
they want child free life not being able to take the load
of bringing up children to make them good humans.

The sexual orientations of LGBT are not fundamental
just as non-vegetarians are born in vegetarian family
or beef eaters are born in Hindu family
LGBT also are born in normal family,
giving this community privilege
is causing increase of their number day by day
resulting in a step forward to extinction of human
since they cannot produce children themselves.

Salvation by extinction is writing on the wall
all disbelievers of this fact will be seen soon
to pack up and fall in line lock stock and barrel.

A carefree man

There was a carefree man
Used to do donation
Even called a beggar
From the street to home
Gave him money
Seeing a sore on his leg,

One day after college classes
He was returning home walking
Found a man lying on the road
He thought the person to be sick
Called a rickshaw put him on it
Paying fare for taking him home.

He used to donate regularly
Starting from his first to the last salary
All along to the religious places
Or for treatment of cancer patients
His endeavour was small
But intent was genuine.

One day he fell ill suddenly
Urgent operation was done
Could not attend office
For forty days
He applied for medical leave
It was rejected, lost huge money.

Once he had to rush to his home town
Since his sister died of cancer
Mother was inconsolable
Took her to his guru for getting solace
But did not get even a word of sympathy
Coming back home she died.

Apathy of God and guru taught him a lesson
He understood all the good work he did
Was of no use in practical life
He dumped both God and guru to the dustbin
Believed himself to be divine needed no buttering
Asked everybody to get salvation by extinction.

Life is a fire ball

One day an ant went for an adventure
the whole of Himalayas was its target
it started from the foot of the mountain
by the time it traveled half a mile
halting in some places for the food,
it saw on the way a flying ant with wings
thought it should have got a pair of them
in order to cover distance fast
to complete its venture
all of a sudden to its bad luck
a bird saw it and swallowed.

In the next birth it got wings
flying here and there on a tree
a lizard saw it and sucked inside the mouth.
Like that, thousands of births it got
but hardly it could cover one mountain
fade up it decided to be a human
took birth as a space scientist
it discovered planets, stars, galaxies
the more it discovered the more remained
he went after discovering aliens
could not get certain evidence either.

Being disgusted he ultimately left every thing
thought whatever he was doing never satisfactory
something always remains unexplored.

In the physical world nobody gets satisfied
it is the extinction only that can bring solace
life is a fire ball in which we are burnt as insects.

Defying God is in our DNA

Inherent nature of human is to defy God
at every moment of our life, we do it
as a child is born, immediately we take care
otherwise, he/she will die by attack of pathogens
or other naturals causes made by the Almighty.

Loving God, obeying God these are nonsense
all religious rituals are appeasing exercises
that has value like praying to a snake not to bite.
God has created beautiful earth with flora fauna
snow clad summits of mountains, deep blue oceans
but what we do is annihilate those by pollution
we are the cause of extinction of many species
why pretend to save a few tigers, lions?

Rather let us take pride by patting on the back
that we are enemy of God as God is to us
let us fight to deactivate the all-powerful
by refusing to do what It asks us to do.
We shall not continue in this hell of a creation
and take refuge to extinction by restricting
every woman to bear only one child.

I am free

I am out for an adventure
from the moment of birth
how I came here don't know
the path is pathetic
traps are laid to kill
at every step forward.

All nonsense is loaded
in my head
'To be afraid of God'
why I should
I am proud -
my Self is my God.

As I proceed further
an unseen power
looks after
lest I faulter
to obey it as a superior
I defy it with a thunder.

I say 'I am always free'
how anybody can dictate
what I shall do or not
leave me alone
I shall make my fortune
as I find best for me.

A new yoga

What is our basic nature?
We are all divine Soul.
Different forms in creation
are evanescent, rushing to die.
I cut an apple it is white inside
but gradually it blackens,
a baby is born so cute
from very next moment
myriad of ways is after the child
to kill making life so uncertain.

Life is nothing but curse
the Creator is the culprit
not only that It through all religions
asks us to love It, the Almighty.
All methods of realization of God
surprisingly emphasize to adore It
but how a tormentor can be hugged
instead, It should be despised
and this forms my new invented
method to achieve salvation.

Hate God to such an extent
that you will not like to meet It
and it is not necessary also for us
as we are always divine and free;
for getting rid of body go for extinction.
